PROFESSIONAL SUMMARY

Highly analytical accounting and bookkeeping professional with more than four years of combined experience across project-based US-client bookkeeping, banking, automotive, and distribution environments. QuickBooks Online Certified ProAdvisor with over two years of project-based bookkeeping support from January 2024 to July 2026. Experienced in reconciliations, AP/AR monitoring, General Ledger support, financial-data cleanup, adjusting and reclassification entries, and P&L and Balance Sheet support. Brings transferable executive and administrative support strengths in confidential records handling, tracker ownership, deadline follow-through, report preparation, stakeholder coordination, and concise client status updates. Works independently, investigates exceptions to their root cause, and escalates only items requiring client judgment or approval.

PROFESSIONAL EXPERIENCE

Independent Bookkeeping Projects | Remote

January 2024 - July 2026

Freelance Bookkeeper / Project Consultant - US Client

- Delivered project-based bookkeeping and accounting support for a US client using QuickBooks Online and spreadsheet-based financial records.
- Reviewed bank and credit-card activity, categorized and reclassified transactions, and maintained a Chart of Accounts aligned with business and reporting requirements.
- Performed reconciliations and traced missing, duplicated, misposted, or incorrectly classified transactions through source records and transaction histories.
- Monitored Accounts Payable and Accounts Receivable, open invoices, customer and vendor balances, and required supporting documentation.
- Created Excel and Google Sheets trackers for AP/AR, reconciliation status, cash movements, discrepancies, client questions, and document follow-up.
- Supported month-end review and P&L and Balance Sheet preparation by improving record completeness and reliability.
- Managed assigned work independently, communicated progress and exceptions clearly, and escalated items requiring client judgment or approval.

Bank of Makati

June 2023 - December 2023

Accounting Associate

- Processed and posted high-volume accounting transactions in Oracle while meeting internal-control, accuracy, and confidentiality standards.
- Reconciled internal accounting records with General Ledger balances and traced unexplained differences to the underlying transactions.
- Investigated unresolved variances using historical reconciliation reports and recommended supported adjustments without forcing balances.
- Extracted and analyzed large accounting datasets in Excel using PivotTables and structured review formats for transparent reporting.

PROFESSIONAL EXPERIENCE - CONTINUED

Toyota Cagayan de Oro City

September 2021 - March 2023

Accounting Staff - After-Sales Financial Reporting

- Managed Accounts Receivable monitoring for after-sales operations and maintained current tracking of dealer and satellite-office transactions.
- Verified customer payments by matching bank deposit slips with open invoices and internal records, then generated Statements of Account in SAP.
- Investigated balancing differences across high-volume records and multiple operational systems to identify discrepancy root causes.
- Prepared reclassification and adjusting journal entries in SAP to correct General Ledger coding errors and support accurate reporting.
- Designed improved Excel trackers that streamlined financial-data organization and resolved recurring record-archiving issues.

Fast Distribution Corporation

June 2020 - December 2020

Accounting Staff - Accounts Payable

- Verified vendor invoices against purchase orders and delivery documentation before payment processing, supporting completeness and internal-control checks.
- Maintained Accounts Payable records, prepared monthly accounting reports, and performed bank reconciliations to identify operational discrepancies.
- Resolved invoice variances and missing-document issues through coordination with vendors and internal stakeholders.
- Improved accounting-record organization and encoding workflows, reducing avoidable data-entry errors and improving document retrieval for review and audit purposes.
